Appendix 1: Question Formulation Template

Nutrition Care Area: ____________________________
Target Population: ___________________________
Usual Setting: ________________________________

Identify Factors

First, list factors that are important and drive practice decisions in the area of nutrition care in the population of interest.

Linkages between Factors

Second, what questions do you have about the relationships or linkages of the listed factors? Consider:
EVIDENCE ANALYSIS MANUAL

- Areas of uncertainty
- Assumption to be verified with scientific evidence
- Variations in practice

Third, list questions:
- Linking assessment or diagnostic factors to intervention factors
- Linking assessment or diagnostic factors to nutrition care outcomes
- Linking interventions to health care outcomes
- Linking interventions to nutrition care outcomes
